

# FDRSS Heavy-Duty Feeder

Hasler, Inc. is pleased to announce the launch of a new heavy-duty, multi-purpose feeder - the **FDRSS**.

This unit is designed to feed all in-line tabbers and address printers at speeds and efficiency that makes every job profitable. In addition, the **FDRSS** is a perfect replacement unit for competitor's feeders that often mis-feed, jam and stop production. This is a production level machine that is perfect for a pro mailer environment or large corporate mail center. It provides a true competitive advantage for you when proposing address technology.

## Product Features

- Heavy-duty, one piece paper guides that extend all the way through the feeder for straight feeding.
- Paper guides descend below the surface of the feed belts - paper cannot "slip out under guides."
- All feed belts are easily repositionable - easily customize the feeder for every job.
- Four feed belts and three traction belts for complete document coverage.
- Multiple, independently adjustable separators - operator can position them where they want.
- Buckle Separation™ eliminates high friction "nip point."
- Adjustable, reversible back wedge - unlimited setup options. Handles small and large media well.
- Completely tool-less setup - quick job changeovers.
- Compact, clean, simple design - easy to use, easy to move.
- Pivot System™ adjustable angle delivery eliminates feeder-to-machine transition problems.
- Belt changes in minutes - minimizes down time and improves production.
