

YOUR COMPACT MAILROOM ASSISTANT

# M7000

Easy-to-use folder inserter that  
grows with your business

**HASLER**  
*America's better choice.®*

## HASLER'S M7000

### YOUR COMPACT MAILROOM ASSISTANT

M7000 is ideally suited for businesses that want flexibility and maximum productivity. With a reversible, full-color touch screen, the M7000 is so easy to use; anyone in your office can operate the system. Whatever application your business comes across, the M7000 handles them all, from invoices to mail shots, even documents with the address at the bottom. Should your business applications change, you know that your investment is protected, because the M7000 is modular and new options can be easily added. After all, the biggest constant in business is still change. As business changes occur, it is important to know your folder inserter will meet your needs.

#### HIGH CAPACITY VERTICAL STACKER

Increase productivity with the high capacity vertical stacker which holds up to 500 finished envelopes.

#### EVERY KIND OF APPLICATION

Thanks to Hasler's unique flexFeed® technology, you can load any document size in each of the 6 feeders. The variety in applications is up to you. Furthermore, you don't need to fan documents before loading.

#### DOUBLE DOCUMENT SECURITY

To ensure that every recipient gets the correct mail piece, Hasler's electro-mechanical thickness detection protects against double feeding. It is unaffected by dust, toner or colored paper. The M7000 measures the thickness of every document from each feeder (secure'n Feed™) and the thickness of the set (secure'n Sert™) right before inserting.

#### EASE-OF-USE

Everybody can use the M7000. The reversible full-color touch screen allows operation from any angle around the machine, and combined with Fill and Start will give you ultimate ease-of-use. No need for trained operators thanks to Fill and Start. Just load documents and envelopes 'n press the button to go! The M7000 will adjust all settings automatically and even save them to memory for instant recall.

### **GROWING WITH YOUR NEEDS**

The M7000 can be expanded from 2 up to 6 stations at any time, providing additional capacity and protecting your investment.

### **MAXIFEEDER™**

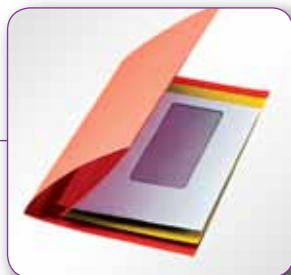

Load up to 1,200 sheets or 325 BRE's in the optional maxiFeeder™.

### **PROFESSIONAL MAIL PIECE**

The M7000 ensures a more professional presentation and reduces the risk of jams by collating documents before folding, which conveniently is also faster and more productive than collating items inside the envelope.

### **POWERFOLD**

With powerFold™ you can crisply and silently fold up to 10 pages in single fold and 8 pages in tri-fold.

### **MAXIMIZE PRODUCTIVITY**

The high capacity vertical stacker reduces incidents of unloading, enabling other tasks to be done in the meantime. It requires less handling and makes it possible to unload up to 500 finished envelopes every eight minutes while running at maximum speed.

### BARCODE READING (BCR)

Barcode Reading (BCR) ensures the integrity of each document and manages the addition of selective inserts to maximize mail personalization. Barcoding represents a powerful alternative to OMR because it is easier to print, read, and track mailing documents. All can be done with little to no IT involvement by using our OMS-100 Software to apply the barcode marks on each page.

### MONITOR, SECURE AND TRACK YOUR PRODUCTION OUTPUT

Is the integrity of your mailing ensured during production? Mail Piece Verification (MPV) is a scanning hardware and software solution, which compliments Hasler's DCS output management software and folding/inserting systems by monitoring the mail piece insertion process and enabling easy reconciliation of missing or damaged documents. It also provides detailed production reports to guarantee end-to-end mailing production integrity from print to insertion.

### OUTPUT MANAGEMENT SOFTWARE – ENRICH YOUR DOCUMENTS

Increase the capabilities of your folder/inserter and automate your entire document creation process. Hasler's optional DCS software helps you to add OMR marks, sort and group documents, and validate mailing addresses to reduce postal spend. DCS shortens document creation cycles and increases profitability for your company.

### FILL AND MAIL

Automate your complete mail flow by connecting the M7000 to a Hasler mailing system. With its reversible touch screen, the M7000 offers unique operator comfort and ease-of-use.

### SPECIAL FEEDERS

These optional feeders have been specially designed to feed a wide variety of paper types, including coated material and even small booklets.

### MANUAL FEED MODE

The Manual Feed mode allows you to process up to 10 sheets fed by hand, stapled or unstapled.

### CASCADE FEEDING

Continuous operation is achieved by cascade feeding. If one feeder runs empty, another one takes over.

### AUTOMATIC DIVERT STATION

To avoid stoppages and maximize efficiency, the intelliDeck® diverts duplicate or faulty documents before folding while the system is still running.

### ENVELOPE SEPARATION

The unique envelope separation mechanism is designed to feed a wide variety of envelope types. This means maximum productivity and ease-of-use.

## HASLER'S M7000

### COMPACT FOLDER INSERTER

#### MODELS

**M7000 EXPERT (2, 4, 6 STATIONS):** All stations have automatic document feeders, processing most mail items.

**M7000 SPECIAL (2, 4, 6 STATIONS):** As well as automatic document feeders, the M7000 Special is equipped with a special feeder for processing special mail items (glossy paper, booklets, pre-folded inserts etc.).

**M7000 CUSTOM BUILT (2, 4, 6 STATIONS):** M7000 Custom offers free choice of configuration: position the special and automatic feeders wherever you want.

#### STANDARD

- Fill and Start
- flexFeed®
- Manual Feed for stapled and unstapled sets
- Multiple sheet feeding
- Cascade feeding from all feeders (including BCR or OMR)
- powerFold™
- Fold-only applications
- Electro-mechanical secure'n Feed™
- Electro-mechanical secure'n Sert™
- Automatic Divert Station
- Tip-to-tip sealing
- 25 programmable jobs
- Upgradability to more feeder stations
- Full color touch screen
- Semi-automatic envelope separation

#### OPTIONAL

- Barcode Reading (BCR)
- Optical Mark Recognition (OMR)
- Flex-OMR: recognition of non-Hasler OMR codes
- Reverse reading
- Short feeders
- maxiFeeder™
- Bottom address applications
- Short fold applications
- Output Management Software
- Mail Piece Verification (MPV)
- Different exits: side exits, conveyor belt, high capacity vertical stacker

### M7000 SPECIFICATIONS

#### DOCUMENT SPECIFICATIONS

- Height: 3.5" – 14"
- Width: 5" – 9"
- Weight: 16 – 67 lbs.
- Feeder capacity: 325 sheets (20 lb.)
- maxiFeeder™: 1,200 sheets (20 lb.) / 325 BRES

#### SET THICKNESS

- Maximum: 2.5 mm

#### ENVELOPES

- Length: 3.5" – 6.5"
- Width: 5.5" – 9.8"
- Hopper capacity: 325 envelopes

#### FOLDING

- Maximum capacity: 10 sheets (20 lb.)
- Maximum weight: 45 lb.
- Fold types: Letter, z-fold, single, double parallel, no fold  $\Delta Z \angle \leftarrow$
- Short fold, small fold: Min 1"
- Note: Bottom address documents only  
single or z-fold and max 5 sheets

#### PERFORMANCE

- Speed: Up to 4,000/hr.

#### DIMENSIONS

- Length: 72"
- Width: 16.5"
- Height: 36.5" (6 stations)
- Weight: 242 lbs. (6 stations)
