

We represent leading edge manufacturers and software companies to help you increase revenue and decrease business expenses in your Business and Logistics operations.

OUR PRODUCTS/SERVICES

Mailing Systems: Our mailing systems have a sleek look & compact dimensions to comfortably fit into any modern office environment. No more visits to the Post Office. No more running out of stamps when you most need them – with our digital postage meters, you'll always have the postage you need.

Folding/Inserting Systems: Our folding/inserting Systems can simplify & automate a variety of office mailings such as daily invoices, legal documents & other mailings. Stop wasting valuable time & money folding & inserting documents by hand. Let our systems handle it for your department or small office – quickly, easily & productively.

Software Solutions: Our software solutions make your mailing operation much more productive. Prepare USPS compliant mailings faster & more easily & achieve increased mail deliverability. Any size mailing operation can reap the benefits of increased address quality & maximize postage discounts using our broad range of Apps.

Supply Chain/Logistics: Our logistical software products support the widest breadth of carriers & services in the industry & provide parcel & LTL shippers one integrated solution for all your shipping needs. We have strong partnerships with all the major parcel carriers & we are certified to deploy carrier compliant shipping solutions.

Addressing Printers & Systems: Our address printer line offers numerous features that will benefit you by saving time & money, as well as giving you an increased response rate when addressing your customers.

Tabbing Systems: Our tabbing systems will assist you when you need to send mail that does not require the use of envelopes. A tabbing system is an inexpensive alternative to envelopes, sealing newsletters, brochures & documents with adhesive or wafer tabs.

Shredders: Our shredder line offers shredders for every need with several levels of security. They shred paper, credit cards, floppy & hard disks, ID cards, USB sticks, and CDs & DVDs into strips or particles. We offer the safest options for shredding sensitive documents such as bank statements, tax documents or personal information directly at a desk in the workplace.

Letter Openers: Our letter openers help you distribute incoming mail faster to people in your organization who are waiting to process documents. This benefits you & your customers by processing incoming payments faster therefore improving cash flow & processing orders immediately to help improve customer satisfaction.

Shipping, Tracking & Analytics: Our shipping, tracking & analytics hardware and software solutions improve efficiency & productivity for incoming & outgoing mail and shipments. We offer cloud-based shipping solutions for desktop enterprises large and small. We offer automated parcel receiving software to track important packages or documents. Thus offering visibility, accountability & control needed to achieve total parcel spend optimization.

Commercial Solutions: Our commercial solutions will assist your high-volume production environment to achieve the best workflow configuration with the right technology. We offer automation that can handle a wide variety of media with higher efficiency & accuracy. We also offer site-specific consultation workflow analysis that will ensure your investment is going to produce the return you need and want today, tomorrow & beyond.
